Summary. The longicorn beetle *Anaglyptus graphellus* Holzschuh, 2011 is recorded for the first time from China.

Key words: Coleoptera, Cerambycidae, Anaglyptini, *Anaglyptus graphellus*, fauna, Yunnan Province, China.

А.И. Мирошников, Б. Лю. *Anaglyptus graphellus* Holzschuh, 2011 – новый для фауны Китая вид жуков-дровосеков (Coleoptera: Cerambycidae) // Дальневосточный энтомолог. 2016. N 319. С. 15-16.

Резюме. Дровосек *Anaglyptus graphellus* Holzschuh, 2011 впервые отмечается для фауны Китая.

INTRODUCTION

At present more than 20 species of the genus *Anaglyptus* Mulsant, 1839 (Cerambycidae: Anaglyptini) are known from China (Miroshnikov *et al.*, 2014; Viktora & Tichý, 2015). One new for the fauna of China species of *Anaglyptus* was collected in Yunnan Province in 2015. The material examined is kept in the collection of the Bin Insect Taxonomy Studio, Beijing, China (cBITS).

NEW RECORD

Anaglyptus graphellus Holzschuh, 2011

Figs 1–3

Anaglyptus graphellus Holzschuh, 2011: 318 (type locality: NE Laos, Hua Phan Prov., Phou Pan Mt., Ban Saleui, 1300–1900 m, ca 20°12' N, 104°01' E); Miroshnikov *et al.*, 2014: 256, color plate fig. 5.

MATERIAL EXAMINED. 1♂ (cBITS) (Fig. 1), **China:** Yunnan Province, Honghe Prefecture, Pingbian County, Daweishan national forest park, Daweishan Mt., 2100 m, 22°32'31.03" N, 103°24'53.90" E, light trap, 26.V 2015, 1♂, leg. Tianlong He; “*Anaglyptus graphellus* Holzschuh, 2011 ♂ det. A. Miroshnikov 2016”. (cBITS).

MORPHOLOGICAL NOTES. Male. Body length 10.3 mm, humeral width 2.75 mm. In comparison with the holotype male (Fig. 2), the antennae look slightly thinner (Fig. 1); all femora in the apical parts are strongly blackened, more strongly contrasting and forming a wider ring than in the types (Figs 2, 3).

DISTRIBUTION. Laos, Vietnam (Holzschuh, 2011), China (new record).

Figs 1–3. *Anaglyptus graphellus*: 1– male from Yunnan Province, China; 2 – holotype male; 3 – paratype female. Figs 2, 3 – after Holzschuh (2011), but colour photographs, reproduced courtesy of Luboš Dembický.

ACKNOWLEDGEMENTS

We are very grateful to Luboš Dembický (Brno, Czech Republic) for the most helpful provision of pictures of the holotype and paratype of *Anaglyptus graphellus* and Kirill V. Makarov (Moscow Pedagogical State University, Russia) who has kindly helped with the preparation of photographs of the Chinese specimen of *A. graphellus*. The second author wants to thank Li He (Chengdu, China) and Tianlong He (Anhui, China) for their continuous support in many ways and kindly providing this valuable material.
