Up to now the leaf-rolling weevils has not been listed from the Bolshekhkhtsirskii Natural Reserve (Khabarovskii krai: enviroments of Khabarovsk) [1, 2]. In 2006 we visit this reserve to collect beetles. To prepare the present paper we also use the collection of the Zoological Museum of Institute for Systematics and Ecology of Animals (Novosibirsk). A list of 18 species of the leaf-rolling weevils is given below. We wish to thank S.V. Spiridonov (Bychikha), V.V. Dubatolov, R.Yu. Dudko and I.I. Ljubechansky (Novosibirsk) for help in our work. Present study is supported by grant RFBR No 06-04-90816-Mol_a.
